- Abloy PL 358 incl. 2 keys
- SCM approved
- Certificate & Security card
- Weight 5 kg
- 2 years warranty
- Galvanised
- Detachable

Some locks are simply closed to competition.

The C.T.S. Bolt lock is one of the mechanical security products for locking container doors. The container bolt lock can serve as container lock and as seallocker.

Applicable to almost any container used in construction and on the road.

This C.T.S. Bolt lock is extremely suitable for prevention against break-in, while the lock protects against opening and outbreaking of the bolt.

That's why it's useless to remove the seal.

The C.T.S. Bolt lock is S.C.M. approved for heavy class. The Abloy PL358 Padlock, which belongs to the Bolt lock, is completely concealed in the housing.

The Abloy Padlocks are available as keyed-differently, keyed-alike or as masterkey system.

Also available on an existing Assa Abloy number.
