

# C.T.S.<sup>®</sup> PROTANKTION

*"WE CARE ABOUT YOUR FUEL"*

SOME LOCKS ARE SIMPLY CLOSED TO COMPETITION.

The C.T.S. ProTANKtion (fuel tank blocker) is a very efficient device, especially developed to protect your valuable fuel from being taken away by unauthorized persons.

The ProTANKtion is lowered on the existing collar of the fuel-tank, and is then fixed with socketscrews. This prevents the ProTANKtion from being removed.

It is also possible to deliver a tankcap with lock.

Standard the ProTANKtion is for 80mm, but the ProTANKtion can be delivered with a special adapter for bayonet feedfiller 105mm (as Volvo, Daf and MAN)

With the ProTANKtion you can leave your truck on the parking-lot or next to the road. **Your fuel is safe!**
