Lock

SOME LOCKS ARE SIMPLY CLOSED TO COMPETITION

The specially developed Trailer Ring Lock is an unique security lock that is clearly designed for a specific purpose. It is the security system for trailers. With this special security lock, which was developed in-house, thieves can forget about hooking up.

A hardened steel shackle pin is slide through the trailer ring and secured with the fantastic, indestructible Abloy padlock. Under the most intensive tests, this lock was found to perform well above the toughest requirements.

The trailer Ring Lock is one of the many C.T.S. mechanical security products for building site and shipment transport, both at home and abroad.

The C.T.S. range includes kingpin locks, container locks, special loading platform security devices, etc.

Master keys can be supplied when several locks or combinations of products are purchased.
